April 1, 2025 – Turner Construction Company is proud to lead the way in sustainable building practices that help reduce carbon emissions and protect our environment. We're committed to building smarter by using innovative technologies, environmentally responsible materials, and energy-efficient solutions to create spaces that are healthier for people and better for the planet. By working closely with our clients, partners, and communities, we're helping to shape a more sustainable future, one project at a time.

"Our teams are dedicated to pushing the boundaries of sustainable construction, and these awards are a testament to their innovation and commitment," said **Julia Gisewite**, Vice President and Chief Sustainability Officer, Turner Construction Company. "By integrating advanced low-carbon concrete solutions, we are not only lowering embodied carbon but also demonstrating what's possible for the future of the built environment."

Underscoring Turner's leadership in adopting next-generation materials and methods that contribute to a more sustainable future, three of its projects—San Francisco International Airport (SFO) Terminal 3 West, the Intuit Dome, and a research facility in Massachusetts—have been honored with [Concrete Innovation Awards](#) by the National Ready Mixed Concrete Association ([NRMCA](#)). These awards recognize pioneering advancements in reducing the carbon footprint of concrete, a critical step in the construction industry's path toward sustainability.

"The 2025 Concrete Innovation Awards showcased the incredible progress our industry is making in reducing its carbon footprint while delivering strong, durable and sustainable structures," said **Lionel Lemay**, NRMCA executive

vice president, structures and sustainability. "These projects are a testament to the collaborative efforts of NRMCA members, designers and builders who are pushing the boundaries of what is possible with concrete."

###

About Turner Construction Company

Our vision is to be the highest value provider of construction services. We deliver our services on complex and challenging building projects of all types and sizes throughout North America and in 30 countries around the world. We seek to create a healthy, prosperous, and sustainable future for our people, clients, partners, and the planet. We have earned a reputation for integrity, working safely, and driving innovation. With a focus on creating an environment where people can be at their best, be authentic, and be treated with respect and dignity, the company is widely recognized as a great place to work. The firm is a subsidiary of HOCHTIEF, an engineering-led global infrastructure solutions provider with leading positions in North America, Australia and Europe and a rapidly expanding presence in high-tech, energy transition and sustainable infrastructure markets.
