## Turner Begins Construction of New Concourse at Ronald Reagan Washington National Airport

*Turner concourse project at Reagan National Airport to provide enhanced passenger comfort and amenities in a more pleasant post-security environment*

Washington, DC. May 24, 2018 – Turner Construction Company is pleased to share that the Metropolitan Washington Airports Authority (MWAA) has issued the firm notice to proceed with construction of a new concourse at Ronald Reagan Washington National Airport (DCA). Part of the airport’s ongoing Terminal B/C Redevelopment Plan—also known as Project Journey—the \$374 million project aims to streamline and enhance the comfort and convenience of the nearly 24 million passengers who travel through the airport each year.

“We are proud to play such a critical role in MWAA’s *journey* to transform the passenger experience,” said Joseph Graziosi, Turner Project Manager, noting that the new concourse will provide a more convenient passenger boarding experience, in part by replacing bus-served gates with passenger boarding bridges. “The new concourse will also offer a brighter and more modern environment, with improved sight lines between concession areas and gates,” he continued. “This gives travelers the ability to easily and directly see the status of flights.” Additional passenger service enhancements include new retail and dining options, an airline club and more device charging outlets.

Turner has already demolished two hangars and the MWAA’s former office building to make way for the new concourse, which includes a two-level connector building with public circulation space, moving walkways and electric vehicle charging stations, all connected to a three-level concourse with 14 regional aircraft gates. At approximately 230,000 square feet, the project will also provide additional concessions and traveler and staff amenities.

Ongoing work at DCA includes a new concourse aircraft parking apron and two 50,000-square-foot Security Screening Checkpoints. The new concourse project is scheduled for completion in 2021.

### **About Turner Construction Company**

Turner is a North America-based, international construction services company. Founded in 1902, Turner first made its mark on the industry pioneering the use of steel-reinforced concrete for general building, which enabled the company to deliver safer, stronger, and more efficient buildings to clients. The company continues to embrace emerging technologies and offers an increasingly diverse set of services. With an annual construction volume of \$11 billion, Turner is the largest builder in the United States, ranking first in the major market segments of the building construction field, including healthcare, education, sports, commercial, and green building. The firm is a subsidiary of HOCHTIEF, one of the world’s leading international construction service providers.
